

# AGRICULTURE VICTORIA

## LOCAL ROADS TO MARKET PROGRAM (LRMP)

*Enabling and improving road and bridge infrastructure across country Victoria for farmers to transport their produce and livestock to markets.*

The objective of the \$25 million Local Roads to Market Program is to improve the efficiency and competitiveness of the agriculture sector.

- The \$25 million LRMP works to improve Victoria's competitiveness by upgrading local roads and bridges to improve our road freight network and enable better connectivity from the farm gate to arterial roads, receival centres, transportation hubs, and national highways.

A safer and more efficient freight network supports farmers by providing more direct routes to destinations, thereby reducing transportation costs and travelling times, and improving the quality of agricultural products shipped to domestic and international markets.

## ACHIEVEMENTS

- In 2018, Round 2 is funding 39 projects worth \$24 million, across regional and rural Victoria.
- Round 1 of the LRMP funded 29 infrastructure projects worth \$22.2 million in 2017.
- Overall, the Local Roads to Market Program has awarded funding to 29 rural shires, 4 regional city councils and 1 interface (outer suburban) council to deliver infrastructure projects from this year through to 2020.

- Over 95% of all funding is for improvements to rural road and bridge infrastructure.
