

# Domestic Animals Amendment (Puppy Farms and Pet Shops) Act 2017

## Commercial Dog Breeders

### What is the *Domestic Animals Amendment (Puppy Farms and Pet Shops) Act 2017*?

The *Domestic Animals Amendment (Puppy Farms and Pet Shops) Act 2017* (PFPS Act) introduces a range of amendments to the *Domestic Animals Act 1994* (DA Act). These amendments deliver on the Government's election commitment to reform the dog breeding and pet shop industries in Victoria and better regulate the sale of dogs and cats.

Under the amended DA Act:

- there are limits on the number of fertile female dogs breeders can keep
- pet shops can only sell dogs and cats sourced from shelters, pounds or enrolled foster carers
- the role of foster carers is clearer
- there are new definitions for 'recreational breeders' and 'microbreeders'
- the definition of 'farm working dogs' is clarified
- an animal sale permit system is established
- traceability of cats and dogs is improved through the establishment of the Pet Exchange Register
- offences apply for publishing non-compliant pet sale advertisements.

### What is a commercial dog breeder?

Changes introduced through the PFPS Act limit the number of dogs allowed on a single rateable property. Breeders are able to have up to 10 fertile females with council approval alone.

To hold 11 to 50 fertile female dogs, breeders must attain approval from the Minister for Agriculture. Those with this approval are defined as an 'approved commercial dog breeder'.

### How do I become an approved commercial dog breeder?

Businesses must first apply to their local council for registration as a Domestic Animal Business (DAB). To be a DAB, a business must:

- satisfy planning permit requirements and receive a planning permit if required
- receive an excess animal permit from their local council, if required
- register as a DAB with their local council in accordance with the Act and local council requirements
- comply with the *Code of Practice for the Operation of Breeding and Rearing Businesses 2014* (revision 2015).

Following registration as a DAB, businesses must apply to the Minister for Agriculture to obtain commercial dog breeding approval.

Applications must be in the required form, and accompanied by the application fee of \$2,844\*.

Businesses will then be subject to an audit and inspection by departmental authorised officers which will be considered by Victoria's Chief Veterinary Officer. On recommendation from the Chief Veterinary Officer, the Minister may then give approval to operate.

Businesses with more than 50 fertile female dogs will not be allowed to operate after 10 April 2020.

\*Note, fees stated are current as at 10 April 2018.

### **How long does commercial breeding approval last?**

Commercial dog breeding approval may be granted for one year in the first year of operation, and for up to three years for each subsequent request for approval.

### **What extra mechanisms are in place to ensure the welfare of dogs in an approved commercial breeding establishment?**

Amongst other things, commercial breeding establishments will be required to:

- undergo audits by departmental authorised officers
- receive final approval from the Minister for Agriculture following a recommendation from the Chief Veterinary Officer
- provide annual reports to the Minister for Agriculture
- ensure all staff have the appropriate qualifications.

### **I have over 10 fertile females. Do I have to apply to be a commercial dog breeder?**

There is no requirement to immediately reduce the number of dogs on your property if you have over 10 relevant fertile females.

Dog breeders may register as a DAB in 2018 and 2019 with any number of relevant fertile females. Breeders have until 10 April 2020 to naturally reduce the numbers down to 10 relevant fertile females with council approval alone.

Under the transitional provisions, if a breeder has over 10 relevant fertile females, they must not acquire any new relevant fertile female dog. Further, upon each year's registration, a breeder must not have any new relevant fertile females on their property, that have not been there for the previous 12 months.

From 10 April 2020, you cannot have more than 10 relevant fertile females on your property, without first receiving commercial dog breeder approval.

### **Will approved commercial dog breeders be on the new Pet Exchange Register?**

Yes. The PFPS Act will establish the new Pet Exchange Register (the Register). All DABs will automatically be included on the Register.

Commercial breeders will be supplied with a source number from the Register that will be required in all advertisements.

Members of the public will be able to access limited information on the Register, regarding advertisers of cats and dogs. This will enable prospective purchasers to determine if a seller is a legitimate breeder.

### **As a commercial breeder, do I use my source number or my DAB number in online advertisements of pet sales?**

From 10 April 2018 to 30 June 2019, commercial breeders must include the dog's microchip number, their DAB number and council name in all advertisements.

After 1 July 2019, it will be an offence to advertise a dog or cat for sale unless the advert includes its microchip number and the source number generated by the Register.

Offences apply to both the person selling the pet, along with the publisher that publishes a non-compliant advertisement.

### **I am an approved commercial breeder, will I be able to sell dogs to pet shops?**

The PFPS Act creates an offence for a breeder to sell cats or dogs to, or through, a pet shop.

Pet shops will only be able to sell dogs over six months of age and cats over eight weeks of age, which have been sourced from a registered pound, animal shelter or voluntarily enrolled foster carer.

Pet Shops have until the end of June 2018 to adjust to the new requirements, with offences commencing on 1 July 2018.

### **Can I be both a commercial breeder and own a pet shop?**

The PFPS Act prohibits the co-registration of breeding, shelter, pound and pet shop DABs on a single rateable property or by the same person in Victoria.

This prevents breeders establishing a supply chain to funnel puppies and kittens into a pet shop. It stops a breeder setting up a breeding establishment in one municipality, an illegitimate shelter in a second, and a pet shop (to on-sell animals from the shelter) in a third.

### **Timeframes**

Existing dog breeding businesses will have until 10 April 2020 to reduce their fertile female dog numbers to 10 or less (or 50 or less, if an approved commercial breeder) by not replacing retiring dogs.

The Register, and associated advertising requirements, will become mandatory from 1 July 2019.
