## Bureau of Animal Welfare Regulation & Compliance, Biosecurity, Victoria

Returns on the use of animals in licensed scientific institutions must be made to the Secretary of the Department of Environment and Primary Industries each year. Details of the return are based on Regulation 100 of the Prevention of Cruelty to Animals Regulations 2008. The Bureau of Animal Welfare oversees the administration of Part 3 of the *Prevention of Cruelty to Animal Act 1986* and Part 4 of the 2008 Regulations, which refer to scientific procedures. Its *Statistics of animal use in research and teaching Victoria* (report number 30) compiles the returns for 1 January to 31 December 2012. It reports only on animals used in Victoria.

Tables 1–12 present data on animals used in scientific procedures. Table 13 presents data on ‘specified animals’ that were produced for scientific procedures but not used for such procedures. A specified animal is a guinea pig, or a rat, mouse or rabbit that is not bred in its native habitat, or a non-human primate. Their production must be licensed under Part 3 of the Act.

Further information on the data collected for this report may be found in the 2012 return guidelines, available at [www.depi.vic.gov.au](http://www.depi.vic.gov.au).
