

# Cultivating Futures in Farming Program Overview

Managing a farm is complex. This program aims to develop the skills and knowledge required to run a modern farming business. The Cultivating Futures in Farming program will assist and support the development of the next generation of farm managers.

The program will develop key financial, business and people management skills with practical tips, tricks, and tools to gain confidence in decision making on farm. Participants in this program learn from experts, peers, and their mentors to make a positive impact in their farm businesses and ensure they sustainable and resilient into the future.

This program is ideally suited to our next generation farm managers starting their business management journey, including working through, and wanting to improve their management skills.

You may have recently returned to your farm business or have been working in the business for a few years but are transitioning to management – this program is for you.

The program is designed for next generation farm managers to attend with their mentors. The focus is on upskilling the next generation in a manner that is fully supported by their mentors.

## Program benefits:

- Connect with like-minded farmers and mentors to share ideas and experiences.
- Receive coaching from experienced Pinion Advisory consultants to implement workshop learnings into key actions to improve your farm business.
- Gain/enhance key financial, business and people management skills required to run a successful and professional farm business.
- Develop your business skills to become an effective manager and leader.
- Benchmark your business and management performance to review and improve.
- Gain confidence in decision making to improve the sustainability of your farm business.
