

Record keeping template

Treatment of aquatic species with veterinary chemicals

Date of treatment	Product trade name	Species of animal	Location of animals	Animal description (age class)	Quantity of product used (dose)	No. of stock	Batch no.	Expiry date	WHP (days)	Date safe for slaughter/ release
29/07/2017	<i>Deltrex chemicals formalin for footrot control in sheep</i>	<i>Rainbow trout</i>	<i>Pond 14</i>	<i>12 months old</i>	<i>15 ppm for 25 hr</i>	<i>20,000</i>	<i>76842</i>	<i>Dec 2018</i>	<i>100 degree days</i>	

WHP - Withholding period

Degree days - Cumulative measure of temperature calculated as the mean daily water temperature summed over a period of time. In this example, the mean daily water temperatures are summed until the WHP of 100°C is reached

Note - This template recognises the chemical applicator as the owner. If the applicator is not the owner (i.e. person for whom the application was carried out), please record the owner's name and address

Veterinary chemical product details must be recorded within 48 hours of use and kept for two years

For details of your legal requirements when using veterinary chemicals visit [the AgVic chemical use page](#).
