

# Scale operator - fixed

## Livestock delivered to scale

All animals must be correctly tagged. If an animal arrives untagged it must be tagged with an orange post-breeder tag allocated to the scale.

Breeder Tags

Post-breeder Tags

All animals must be accompanied by a fully completed vendor declaration.

## Livestock scanned at scale

All animals must be scanned.

If an animal's tag cannot be read with the scanner the tag must be removed and replaced with an orange post-breeder tag allocated to the scale.

## NLIS transfer completed

The NLIS transfer must be completed before the animals are dispatched from the scale if going direct to an abattoir/knackery OR completed by close of business the following day, if going to a property or feedlot.

The transfer must be completed as a scale 'in' and 'out' transfer on the NLIS database.

The PIC on the NVD must be used as the 'from' PIC in the transfer.

## Livestock transferred to destination

If animals are not unloaded at the destination PIC included in the transfer, the transfer must be updated.

The vendor declaration must be provided to the receiver of the livestock at the point of arrival.
