

S4 medicated feed order

A medicated feed order is a form for a veterinarian to authorise a feed mill to supply S4 medicated feed to a farm.

All details must be entered to be compliant with legislation and good veterinary practice.

Inclusion rate of active ingredient.

Inclusion rate of product.

Withholding Period

WHP

The WHP must be specified, regardless of whether you are using the labelled or an off-label dose.

Off-label authorisation requirements:

- Must not be contrary to the specific label constraints
- Must be approved for at least one major food producing species
- Client must be informed that use is off-label
- Veterinarian must consider and assign an appropriate WHP, for which they are legally responsible if that proves to be inadequate.
