

Scale operator - mobile

Livestock picked up

All animals must be correctly tagged.

Breeder Tags

Post-breeder Tags

All animals must be accompanied by a fully completed vendor declaration.

Livestock scanned on farm

All animals must be scanned.

Any animals with non-reading NLIS tags must be retagged with an appropriate NLIS tag, or be left behind.

NLIS transfer completed

The NLIS transfer must be completed before the animals are unloaded off the truck or trailer if going direct to an abattoir or knackery
OR
 completed by close of business the following day, if going to a property or feedlot.

The transfer must be completed as a scale 'in' and 'out' transfer on the NLIS database.

The PIC on the NVD must be used as the 'from' PIC in the transfer.

Livestock transported to destination

If animals are not unloaded at the destination PIC included in the transfer, the transfer must be updated.

The vendor declaration must be provided to the receiver of the livestock at the point of arrival.
