**NLIS Sheep & Goat tagging requirements:**

- From 1 January 2022 all sheep and most goat breeds regardless of their age must be tagged with an electronic NLIS (Sheep) tag before leaving a Victorian property to go to a saleyard, abattoir, agricultural show or to another property with a different PIC.
- After sheep and goats are moved between properties with different Property Identification Codes (often called a P2P movement) it is the responsibility of the buyer/receiver of the stock to complete a transfer on the NLIS database (nlis.com.au) within two days of the stock movement. This excludes movements of livestock directly to saleyards, public auctions on farm, abattoirs and knackeries.
- Pink Post-breeder tags are used to identify sheep and goats that are introduced onto a property and lose their tags.
- If sheep and goats are already identified with an electronic NLIS (Sheep) tag, do not attach a second electronic NLIS (Sheep) tag.
- NLIS (Cattle) tags must not be used to identify sheep or goats and electronic NLIS (Sheep) tags must not be used to identify cattle.
- Visual and electronic NLIS (Sheep) tags must not be removed from purchased sheep and goats.
- NLIS (Sheep) breeder and post-breeder tags can be attached to either ear, although fewer tags are lost from the left ear during shearing.
- If you tick the Ovine Johnes Disease (OJD) Gudair approved vaccinate box your tags will have a 'V' in a circle printed on them to indicate the sheep have been vaccinated with the approved OJD Gudair vaccine by 16 weeks of age, or vaccinated after 16 weeks of age with the approved OJD Gudair vaccine when the flock was in the SheepMap, or had undertaken a negative faecal 350 test in the two years preceding the vaccination or had a negative abattoir 500 status at the time of vaccination. If this does not apply to you please tick the N/A box.
